

Put a Department of Homeland Security  
**BIO-WARFARE AGENT RESEARCH FACILITY**  
**AT THE LIVERMORE NUCLEAR WEAPONS LAB**  
**SITE 300 IN TRACY, CA?**

**No Way !**

We, the undersigned, oppose the plan to build a bio-warfare agent research facility at Site 300 in Tracy. A 30-acre complex with a "Bio-Safety Level-4," is being planned. This BSL-4 designation is reserved for facilities that handle the **most** dangerous pathogens, like Ebola virus and other diseases for which there is no known cure. We note that Site 300 is already a federal Superfund cleanup site due to toxic and radioactive pollution.

***Do not put dangerous biological agents here.***
