BIGGER EXPLOSIONS WILL BE DETONATED AT SITE 300 IN THE OPEN AIR!

YOUR OPPORTUNITY TO LEARN MORE & COMMENT WILL BE

MONDAY, NOVEMBER 20 @ 6:30 PM
902 N. CENTRAL AVE. SUITE #201, TRACY

Site 300 is an 11-square mile high explosives testing site used for research and development of nuclear weapons and located on Corral Hollow Road near Tracy. Site 300 is part of the Livermore Lab.

Livermore Lab plans to increase the amount of high explosives used in open-air tests at Site 300 from the current limit of 100 pounds per day to 1,000 pounds per day, a 10-fold increase daily!

Livermore Lab plans to increase the annual amount of high explosives detonated in the open air from the current limit of 1,000 pounds per year to 7,500 pounds, a more than 7-fold increase yearly!

The proposed larger blasts will involve numerous toxic materials. (Source: DOE/EA-2076, published November 2017).

The proposal to increase the size of high explosive tests in open-air at Site 300 was just released this month. Yet, the public comment period is scheduled to end December 7. So, Tri-Valley CAREs’ & the Tracy Environmental Advisory Committee will host this time-critical informational meeting and strategy session for residents of Tracy and other interested members of the public. Join us!

Snacks and refreshments will be served
