

2016 YOUTH VIDEO CONTEST

Are Clean Groundwater Aquifers Important to you?

FACT: Both the **Lawrence Livermore** nuclear weapons lab's **Main Site** and its **Site 300** High Explosives Testing Facility in Tracy are on the EPA's "**Superfund**" list of the most contaminated sites in the country because of severely contaminated groundwater. At its current rate cleanup will take decades.

What does this mean to you?

Contaminated water from nuclear weapons activities at Livermore Lab has seeped into the aquifer

Create a Video that Represents Your Perspective

**Enter your 2 minute (or shorter) video
for a chance to win \$500!**

Submission is open. All videos are due by **October 31, 2016.**
